TECHSTERN

KOA

KOA provides technology for residential mortgage loan packages. The experience in residential mortgage industry, financial technological company and data analytics group make them unique and one of the trusted third party organizations in providing loan packages and licensing of the firms.

Challenges

KOA wanted an application for their loan management system for both admin and users module where users can bid for loans and admin gets graphical as well as tabular insights of all the assets and loans.

Technology

★ The automated backend was developed with the cloud of SQL Azure Database with all the functions of Azure web development.

★ The configuration and customization to run web apps in the scripting languages was incorporated in the Azure cloud services.

★ Enhancements of the Grids, charts, reports with the Telerik Kendo UI were achieved.

★ The robust framework of ASP.NET MVC 5 with HTML5, CSS3, jQuery customization provisions made it responsive.
